

## Portfolio

I've worked on mostly corporate intranet and internal applications, but included are a few examples of my work. DataTrac:

This is an set of database applications dynamically linked to a web site for tracking lawsuits.

{mospagebreak title=Mardi Gras Bead Company} Mardi Gras Bead Company: This was a E-Commerce site designed using OSCommerce with various modifications. The system supported wholesale and retail customers. The company was eventually sold to a larger e-tailer and the site was abandoned in favor of their existing system. {mospagebreak

title=Nortons Cafe} Nortons Cafe: This is a promotional site for a St Louis based restaurant. It's based around a Joomla! core with a custom template. Go to [www.nortonscafe.com](http://www.nortonscafe.com) if you'd like to visit. {mospagebreak title=Soulard

Ambassadors Club} Soulard Ambassadors' Club: This is a neighborhood promotional site. It's also Joomla! based, with many addons and features. The template structure is set up for a news-oriented site, but can also accomodate the dynamic nature of this community based group. Visitor blogs, a public messaging forum, event calandars and photo galleries are all featured on this site. {mospagebreak title=Soulard Security Association} SSNView: This is a Windows

Application for monitoring security cameras as part of a "Electronic Neighborhood Watch" program
